Key Characteristics of the Position

The position has been analyzed relative to four key characteristics. These characteristics are accountability for results, results through people, authority, and risk. Based on the responses to the questionnaire, these characteristics have been measured on a sliding scale and are illustrated by a bar graph. The scale range includes none, slight, moderate, significant, and major.

Accountability For Results: This characteristic addresses the accountability for producing measurable results in the position. This includes accountability for meeting financial, operations and/or system objectives.

Results through People: This characteristic address the emphasis on producing results through the efforts and cooperation of people. This characteristic is not limited to management or leadership positions. Many non-management or leadership positions in team-based organizational structures depend heavily upon the efforts and cooperation of people to produce results.

Authority: This characteristic addresses the level of authority that exists in the position. Evidence of authority can be found in the ability to make decisions or changes without prior approval from upper management. This characteristic is not limited to management or leadership position.
